

Firewall 11.0: Troubleshooting (EDU-330)

COURSE DETAILS

| | |
|----------------|----------------|
| Course Code: | EDU-330 |
| Delivery Type: | Instructor-Led |
| Duration: | 3 Days |

COURSE PREREQUISITES

Participants must complete the Firewall Essentials: Configuration and Management (EDU-210) course. Participants must have strong practical knowledge of routing and switching, IP addressing, network security concepts, and at least six months of on-the-job experience with Palo Alto Networks firewalls.

COURSE CONTENT

The Palo Alto Networks Firewall: Troubleshooting course is three days of instructor-led training that will help you:

- Use firewall tools, including the CLI, to investigate networking issues
 - Follow proven troubleshooting methodologies that are specific to individual features
 - Analyze advanced logs to resolve various real-life scenarios
 - Solve advanced, scenario-based challenges
-

COURSE OBJECTIVES

Successful completion of this three-day, instructor-led course will enhance the participant's understanding of troubleshooting the full line of Palo Alto Networks next-generation firewalls.

Participants will perform hands-on troubleshooting related to the configuration and operation of the Palo Alto Networks firewall.

Completing this class will help participants develop an in-depth knowledge of how to troubleshoot visibility and control over applications, users, and content.

COURSE OUTLINE

- 1 - Tools and Resources
- 2 - Flow Logic
- 3 - Packet Captures
- 4 - Packet-Diagnostics Logs
- 5 - Host-Inbound Traffic
- 6 - Transit Traffic
- 7 - System Services
- 8 - Certificate Management and SSL Decryption
- 9 - User-ID
- 10 - GlobalProtect
- 11 - Support Escalation and RMAs
- 12 - Next Steps

Firewall 11.0: Troubleshooting (EDU-330)

WHO SHOULD ATTEND

Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, Network Engineers, and Support Staff
