

## IB-NDIW: NIOS DDI Introduction Workshop

---

### Course Description

This workshop delves into the NIOS Grid fundamentals, covering its architecture, communication, and security. Lab exercises provide hands-on practice with the Grid Manager Interface, including service checks and dashboard configurations. This course provides a basic overview of NIOS, including the concepts of the NIOS Grid, the roles of Grid Members, Grid communication among Grid members, exploring the intricacies of the Grid Database, and comprehending the security measures implemented by the NIOS Grid to ensure protection and resilience

### Prerequisites

- Using the NIOS Grid Manager UI

### Course Outline

- NIOS Grid Overview
- Using the NIOS Grid Manager UI

### Included Labs

- Verifying services are running in NIOS
- Verifying NTP configuration in NIOS Grid
- Verifying NIOS Grid backup configuration
- Locating NIOS disaster recovery candidate
- Using NIOS Status Dashboard
