

OnCommand Insight: Business Insights (NA- OCIBI)

Course Description

In this course you will become familiar with some of the most important features of OnCommand Insight relevant to the day-to-day management, monitoring, and troubleshooting of data infrastructures.

This course concentrates on the reporting features of OnCommand Insight and the OnCommand Insight Data Warehouse. This course demonstrates how to use OnCommand Insight to perform operational reporting that aid in daily administrative tasks. This course will also demonstrate how to use IBM Cognos Workspace Advanced to perform Business Reporting.

This course consists of seven modules. The first module will describe OnCommand Insight and explore the reporting needs of an organization.

The second module demonstrates the operational reporting capabilities of OnCommand Insight by creating three dashboards. Module three describes the Insight Data Warehouse. Modules four through six demonstrate some of the business-level reporting capabilities of the Data Warehouse. The students will create three business level reports around chargeback, virtualization, and storage consumption.

By learning how to create customized reports, it is hoped the student should come away with a basic understanding of how to extend Insight to meet other business reporting needs.

A seventh and concluding module concentrates on the how to maintain the OnCommand Insight reporting environment. .

Course Duration:

2 days.

Prerequisites:

- OnCommand Insight Technical Overview (Recommend/not required)
